

FIBREHOOD (PRIVATE) LIMITED
RESIDENTIAL SERVICE LEVEL AGREEMENT
VERSION 2.0

ANNEXURE 1A TO THE STANDARD TERMS & CONDITIONS

1. PURPOSE

This Residential Service Level Agreement ("Residential SLA") establishes the service standards applicable to Fibrehood residential broadband services.

The Residential SLA forms part of the Fibrehood Standard Terms & Conditions.

2. SERVICE NATURE

Residential Fibre Broadband is a shared-access, best-effort service designed for:

- Home internet access
- Streaming
- Gaming
- Social media
- Work-from-home use
- General residential use

The service is not intended to support critical business operations.

3. NETWORK AVAILABILITY

Target Availability

99.5% Annual Availability

Availability excludes:

- Planned maintenance
- Emergency maintenance
- Force majeure
- Customer equipment faults
- Power failures
- Third-party outages
- Wi-Fi issues

Availability targets are service objectives and not guarantees.

- Fibre cut
- OLT outage
- Backbone outage

Target Response

Within 4 Business Hours

Target Restoration

Within 2 Business Days

Priority 2 – Service Degradation

Examples:

- Intermittent service
- Slow speeds
- Packet loss

Target Response

Within 1 Business Day

Target Restoration

Within 4 Business Days

6. INSTALLATIONS

New Connections

Existing Fibre Coverage Areas:

Target: 14 Business Days

New Build Areas

Subject to network construction schedules.

7. ACTIVATIONS

Where fibre infrastructure is already installed:

Target Activation:

Within 3 Business Days after:

- Payment received
- Documents completed
- ONT installed

8. EXCLUSIONS

The following are not covered:

- Wi-Fi coverage
- Customer routers
- Smart TVs
- Laptops
- Phones
- Internal home wiring
- Power failures

9. CALL-OUT CHARGES

Where Fibrehood attends site and the fault is found to be:

- Customer equipment
- Customer negligence
- Internal wiring

A charge may apply.

10. SERVICE CREDITS

No service credits apply to Residential Services.

11. SERVICE DISCLAIMER

Residential broadband is provided on a best-effort basis.

Actual speeds depend on:

- Customer equipment
- Wi-Fi conditions
- Network load
- Internet destination performance
